III. The bridge table

IV. The interface between the expenditure system and accounting (JISSR)

## I. General background

- In general, the state budget is classified depending on two major axis: purpose and nature;
- Purpose stands for the budgetary means used by each Ministry, Directorate and project. In result-based management, it stands for missions, programs and actions at the basis of the list;
- Result-based management is undoubtedly a progress, given the close connection it creates between the budget and Government policies translated in the programs and mission it has set for itself;
- Result-based management enables the citizens, the Parliament and observers to understand the budget and the objectives targeted by means of its implementation;
- The nature stands for the type of public expenditure. From this perspective, expenditure can range from staff costs, goods and services costs, grants, interest rates, depreciation etc.
- If from a means-bound perspective, the budget is restrictive given that the law on public finances in place does not allow for a high level of specialization (in what concerns Mauritania), the programs budget is aimed at bringing About more flexibility, especially in what concerns the nature.
- Natures are to be found both in the means-bound budget and in the programs-bound budget because they constitute a crucial connection between budget and accounting.

### Issues

- Many of the paragraphs concern actions, not natures;
- The law on finances was adopted with these inconsistencies and it prevails over the decree establishing the budget classification;
- Accounting charging in a standard-compliant accounting was impossible;
- Class 9 enabled charging budgetary expenditure operations;
- This classification, as it stands, is a hindrance to the accounting reform envisaged currently.

## II. Budget classification reform (Mauritania)

### Some thoughts

- The underlying idea was to rely on a standard-compliant chart of accounts ' (IPSAS) for the establishment of a Budget classification for fixed natures.
- Since the chart of accounts is exhaustive, every nature should have in theory been covered.
- The theoretical match was:

Sections	Two-figure accounts
Articles	Three-figure accounts
Paragraphs	Four-figure and over four-figure accounts

**⚠ The issue** The IMF insisted that the initial classification of sections be kept

- The solution consisted in adding under the paragraph a sub-paragraph and to back it against the chart of accounts starting from the level of articles;
- In order to secure things, the principle of establishing a bridge table ensuring extra-flexibility was adopted;
- The bridge table allies every sub-paragraph to a simple account and a counterpart account.

## II. Reform of budget natures' classification (Mauritania)

### The chart of accounts

Account	Designation
1	Profit and debt account
10	Integration account
12	Balance carried forward
13	Profit or loss in the financial year
15	Provisions for risks and charges
16	Borrowing and related debt
17	Other debt
18	Liaison accounts
19	Rescheduled and reported debt
2	Capital expenditure account
20	Intangible fixed assets
21	Tangible fixed assets
22	Fixed assets subject to a concession
23	Fixed assets in progress
24	Strategic or emergency stocks
26	Participating interests and related debt receivable
27	Loans and advances
28	Depreciation
29	Provisions for fixed assets depreciation
3	Stocks, and internal liaison accounts
31	Materials stocks
32	Supplies stocks

38	Depreciation of supply stocks
39	Internal liaisons
4	Personal account
40	Suppliers and related accounts
41	Debtors to the State and related accounts
42	Staff costs
43	Treasury correspondents and related accounts
44	State and foreign institutions
45	Depositors
46	Debtors and creditors, sundry
47	Transitional or pending accounts
48	Adjustment accounts
49	Provisions for personal accounts depreciation
5	Marketable securities
53	Checks, bills and liquid assets receivable
55	Banks, financial institutions and related
56	Cash in hand
57	Imprest account and related
58	Flows between financial accounts
59	Provisions for marketable securities
6	Expenditure accounts by nature
60	Procurement of goods
61	External charges
62	Other external charges

## II. Reform of budget natures' classification (Mauritania)

### The chart of accounts

63	Subsidies
64	Grants and transfers
65	Staff costs
66	Other expenditure
67	Financial expenses
68	Appropriations to depreciation
69	Appropriation to provisions
7	Proceeds
71	Fiscal earnings
72	Non-fiscal earnings
73	Current grants
74	Other proceeds
75	Proceeds from securities
76	Proceeds from other financial assets
77	Pensions contribution
78	Transfer of expenditure
79	Reversals of provisions
8	Off balance-sheet commitments
80	Commitments granted
81	Commitments received
82	Notification of credits

- The chart of accounts is inspired from the The General Chart of Accounts (the chart of accounts of Mauritanian companies), from the OHADA chart of accounts and the French chart of accounts.
- The chart of accounts is made up of 8 classes (1 Profit or loss, 2 assets, 3 stock and liaison, 4 third parties, 5 investment, 6 charges, 7 proceeds, 8 off balance-sheet)
- It is made up of aggregation accounts and assignment accounts.
- The table of two figure accounts are developed;
- Crossed-out accounts can not be debited with budgetary expense operations.

## IV. The interface between the expenditure system and accounting (JISSR)

### Accounting dynamics of the JISSR interface

- JISSR is the information system consisting of an interface between the Beit El Mal governmental accounting system and RACHAD governmental expenditure chain
- JISSR accounts for in 3 phases
  - Reception of orders
  - Appeals (oppositions)
  - Settlement
- The accounting of the 3 phases is carried out automatically.
- It is of course verified and centralized in the various relevant services

### The reception

- Occurs after the approval of the paying agent
- Consists in debiting one of the accounts in classes 2, 3 or 6 and crediting a class-4 account
- JISSR accounts this phase according to the bridge table shown previously

Thank you for your  
attention...
